June 7th, 2017

Dear Members of the NYCPM Community,

Research and publications within the medical and scientific community are an indelible mark for all time to come, not only for the individual making them but equally important for the academic institution they hail from.

The New York College of Podiatric Medicine is extremely proud of contributions made by its faculty to the medical literature and knowledge base, and properly wishes to acknowledge them at this Awards Ceremony.

Your endeavor not only instructs, mentors, and provides others with useful information, but demonstrates your passion and thirst to discover and report new and meaningful thoughts, concepts and facts to improve the human condition.

We proudly salute you with a great sense of pride and admiration.

With very best wishes,

Michael J. Trepal, DPM
VP for Academic Affairs and Dean
June 7th, 2017

Dear Colleagues,

The New York College of Podiatric Medicine is a community of teachers, practitioners, scholars, and students that exists not only to train outstanding doctors of podiatric medicine, but also, more broadly, to generate, transmit, and disseminate knowledge about the causes, prevention, and treatment of diseases and physical problems of the lower extremity, as well as knowledge about other subjects in areas that may be susceptible of learned or scientific inquiry by members of our faculty.

Society often tries to place other responsibilities upon an institution such as ours, including job creation, economic development, social reform, real estate development, and even political involvement. However, we must remain true to who we really are, and must not lose sight of our reason for being. We must continue to be a community of teachers and scholars highly focused on our Mission within the realm of podiatric medicine.

Clear and unmistakable evidence that we are fulfilling our Mission is the fact that our faculty has published an impressive body of articles and research papers in a wide range of peer-reviewed scientific journals and books. It is with great pride and pleasure that I bring to your attention the articles and papers in the following Faculty Bibliography. It is my hope that – in addition to providing you with food for thought, and with insights that may be helpful in your own work – the scope and range of subjects covered in the Faculty Bibliography will perhaps inspire further scholarship and research that will continue and advance the strong tradition of scholarly inquiry that exists among the faculty at the New York College of Podiatric Medicine.

Sincerely Yours,

Louis L. Levine, M.A., L.H.D., C.S.W.
President & Chief Executive Officer

Dear Colleagues,

The Library is privileged and honored to join in the recognition and celebration of NYCPM academic publishing. While compiling the citations, we had the opportunity to appreciate the depth and scope of scholarly contributions our Faculty and students produced last year; it was a truly humbling experience. We are proud to be part of an institution that recognizes research and publication as vital to the educational process as well as to the advancement of knowledge.

Library staff began this process by requesting citations for work published in 2016. Criteria to be met were simple enough: the work had to be either a scientific paper in a peer-reviewed journal, a book or a book chapter, or a scholarly communication such as conference presentation or poster. Affiliation to the College had to be clearly expressed.

If a paper has been authored by multiple NYCPM student researchers, the item is repeated throughout the bibliography, hence the total of 41 citations. Taking redundancy into account, we have 10 distinct citations of works authored by 24 researchers in the Student Bibliography.

For your convenience we have added links to most citations publishers’ page. Many of them are available in full-text format, but most offer only their online abstracts due to licensing restrictions. Should you wish to obtain the full-text of such citations, do not hesitate to contact library staff. Presentations have been linked to their conference websites when available.

Our warmest and most respectful congratulations to the NYCPM student research community.

Sincerely Yours,

Paul Tremblay, MLIS, MA
Chief Medical Librarian
