May 2019

Dear NYCPM Students:

NYCPM is dedicated to providing the highest quality instruction for future doctors of podiatric medicine as well as to providing outstanding care of the lower extremity in clinical practice in the FCNY.

Part of our stated mission is to “support pre-clinical, clinical and educational research,” and one of the ways we accomplish this is to teach students research techniques, introduce them to the literature and other outlets, and encourage them to investigate topics that pique their curiosity. While these are lessons to last a lifetime, some of our most industrious students go further and make the time to contribute to research articles or posters; their published work will enter the universal professional canon.

This is the fifth compilation of published student writing by NYCPM. There are 7 distinct citations in their bibliography, out of a total of 24 citations, representing 21 student authors. This bibliography reinforces NYCPM’s position on the cutting edge of scholarship in podiatric medicine.

I am truly amazed whenever our very busy students find the time to investigate topics that engage them; their work helps them and everyone in the field improve their understanding of the causes, prevention and treatment of diseases and physical problems of the lower extremity. Our fervent hope is that some of these authors maintain their curiosity and continue to author articles or posters well into their professional years.

Sincerely,

Louis L. Levine, M.A., L.H.D., C.S.W.
President & Chief Executive Officer
May 2019

Dear Colleagues,

The Library is privileged and honored to join in the recognition and celebration of NYCPM academic publishing. While compiling the citations, we had the opportunity to appreciate the depth and scope of scholarly contributions our students produced last year; it was a truly humbling experience. We are proud to be part of an institution that recognizes research and publication as vital to the educational process as well as to the advancement of knowledge.

Library staff began this process by requesting citations for work published in 2018. Criteria to be met were simple enough: the work had to be either a scientific paper in a peer-reviewed journal, a book or a book chapter, or a scholarly communication such as conference presentation or poster. Affiliation to the College had to be expressed.

If a paper has been authored by multiple NYCPM student researchers, the item is repeated throughout the bibliography, hence the total of 24 citations. Taking redundancy into account, we have 7 distinct citations of works authored by 21 researchers in the Student Bibliography.

For your convenience we have added links to most citations publishers’ page. Many of them are available in full-text format, but most offer only their online abstracts due to licensing restrictions. When available and appropriate, the PMID or PMCID is mentioned and linked. Should you wish to obtain the full-text of such citations, do not hesitate to contact library staff. Presentations have been linked to their conference websites when available.

Our warmest and most respectful congratulations to the NYCPM student research community.

Sincerely Yours,

Paul Tremblay, MLIS, MA
Chief Medical Librarian
